**DECLARATION OF PATRICK ORMOND**

I, Patrick Ormond, do hereby depose and say as follows:

1. I am a Certified Public Accountant and am currently employed as an Auditor in the United States Attorney's Office, District of Massachusetts. My responsibilities include the investigation into the financial aspects of legal matters.
2. Except as otherwise indicated herein, I have personal knowledge of the matters stated in this declaration.
3. I was assigned to the matter *United States ex rel. Ven-a-Care of the Florida Keys, Inc. v. Abbott Pharmaceuticals* and was asked to review and summarize price information regarding the 44 Abbott products at issue in this case (the "Subject Drugs"). To perform this assignment, I reviewed Abbott's list prices which were reported by Abbott to the publishers of the RedBook and the BlueBook (also known as the National Drug Database File or the "NDDF database"), the prices published by RedBook and the NDDF database as the Average Wholesale prices ("AWPs"), and the average selling

prices ("Average Prices") calculated by Dr. Mark Duggan using Abbott's transaction data.

4. Attachments A1 through A44 contained in Appendix A graphically summarize four prices for each of the Subject Drugs over the time period of 1991 through 2002. The prices are: the Abbott reported list prices, the RedBook published AWP, the NDDF published AWP, and the Average Prices as calculated by Dr. Duggan. The data points in these attachments were based upon and accurately summarize the data contained in Appendix B, Schedules B1 through B4 which allow for a comparison between the data as is described in more detail below.
5. Attachment A45 contained in Appendix A calculates, for each quarter for each of the Abbott NDCs, the numerical percentage "spread" between the NDDF published AWP and the Transaction Based Average Prices as calculated by Dr. Duggan. These spreads are the numeric calculations of the spreads reflected graphically on Attachments 1 through 44. I calculated the spreads by the following formula:

$$(NDDF \text{ published AWP} - \text{Average Prices}) / \text{Average Prices}$$

The numerical percentage spreads in Attachment A45 accurately summarize the data contained in Appendix B, Schedules 1 through 4 as described in more detail below.

#### **PART I: Sources of Price Information**

6. The sources of the information reflected in Attachments A1 through A45 contained in Appendix A are: (1) Abbott pricing documentation, including Abbott price catalogs and communications relating to prices between Abbott, RedBook and FDB, the publishers of the BlueBook, (2) prices as published in the RedBook and the FDB NDDF database, and (3) the Average Prices as calculated by Dr. Duggan.
7. I obtained most of the Abbott list prices from copies of Abbott catalogs provided to us by Abbott during discovery, namely, catalogs for the years; 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997 (partial), 1998, 2001 and 2002. The catalog in our possession for the year 1997 is missing the pages which contain all NDCs prior to NDC 2422-12. One of the NDCs listed in this matter, 1966-07, is among those missing. For Abbott list prices for the year 1999, I used the prices as attached in an email from Abbott employee Jerrie Cicerale to a Kathy (last name unknown) at First DataBank. The email is dated April 15th, 1999, is Bates Stamped ABT-DOJ0191058 and was produced to us by Abbott in discovery. My understanding is that there was no price catalog for the year 2000, so no separate comparisons to the compendia were necessary. I also reviewed two

email transmissions of wholesale price data which were sent to FDB by Abbott with effective dates of May 7, 2001 and May 7, 2002 which are Bates Stamped CA-ABT006514 and ABT-DOJ-E 0219570 and were produced to us by Abbott in discovery. The Abbott list prices which I identified in the forgoing documents are truly and accurately summarized in Schedule B1 of Appendix B.

8. I obtained the published RedBook prices published annually by Thompson Publishing (and in the early years, Medical Economics) by looking the prices up in copies of the actual RedBooks. I used RedBooks published in 1991 through 2004. I prepared a summary of the prices listed in the RedBooks as being the AWP's for the Abbott Drugs. The RedBook AWP's which I identified in the published RedBooks are truly and accurately summarized in Schedule B2 of Appendix B.
9. I obtained the published BlueBook (FDB) prices from the First Databank NDDF database. These were provided to me by Ian Dew of Steck Consulting. Mr. Dew explained to me that he identified the AWP's of the pertinent Abbott drugs contained in the NDDF data which he had acquired directly from First Databank and provided a copy of those prices to me. Mr. Dew provided this subset of data to me in electronic format. A true and accurate copy of the NDDF prices provided to me by Mr. Dew is printed out in Schedule B3 of Appendix B. It should be noted that FDB publishes prices on an ongoing basis. The available NDDF database consists of the last ten changes plus the originally entered price from as far back as 1987. Therefore, changes which occurred more than ten changes in the past are dropped. The result of this is that I could not compare many of the prices for the year 1991, as they had been purged from the FDB record.
10. I obtained from Mr. Dew a copy of the Average Prices calculated by Dr. Duggan using Abbott's transaction data. A true and accurate copy of the Average Prices provided to me by Mr. Dew is contained in Schedule B4, Appendix B. My understanding is that these prices are based on the indirect pharmacy weighted average price as charged by Abbott, or, when such a price was not supported by transaction data for that quarter, the higher of the immediate previous or following quarterly Average Price.

#### **Abbott List Price to AWP Comparison**

11. I calculated the percentage differences between the Abbott list prices found in the Abbott catalogs and the AWP's published in the RedBooks and in the FDB NDDF database. From 1991 to 2000, I found that the vast majority of the published AWP's were approximately 18.75% higher than the Abbott list prices contained in the Abbott catalogs and e-mails. Schedules B5 and B6 of Appendix B lists these comparisons.

12. For the years 2001 and 2002, I compared the published FDB NDDF database prices to the Abbott wholesale prices as reported to NDDF in emails dated April 30, 2001 and May 7, 2002. During this time period, I found that the majority of the FDB NDDF database AWP's were approximately 25% higher than the wholesale prices provided by Abbott. Schedule B7 of Appendix B lists these comparisons.

I swear under the penalties of perjury that the foregoing statements are true and correct to the best of my knowledge.

Dated: July 21, 2009

  
Patrick Ormond
